(1) Period end purchased loan balances include loans held for sale of $\$ 975$ thousand at December 31, 2016.
(2) The total return on purchased loans represents scheduled accretion, accelerated accretion, gains on asset sales, and other noninterest income recorded during the period divided by the average invested balance, which includes loans held for sale, on an annualized basis.
The total return does not include the effect of purchased loan charge-offs or recoveries in the quarter.
2. Deposits decreased by $\$ 41.2$ million, or $4.6 \%$, from June 30,2017 , attributable primarily to a decrease in money market accounts of $\$ 22.3$ million, or $6.0 \%$, and a decrease in time deposits of $\$ 19.4$ million, or $5.8 \%$.
3. Shareholders' equity increased by $\$ 7.2$ million, or $5.9 \%$, from June 30,2017 , primarily due to earnings of $\$ 7.9$ million, partially offset by stock option exercises which decreased additional paid-in-capital by $\$ 1.1$ million and dividends paid on common stock of $\$ 177$ thousand. Additionally, there was stock-based compensation of $\$ 485$ thousand.

Net income increased by $\$ 204$ thousand to $\$ 3.3$ million for the quarter ended December 31, 2017, compared to net income of $\$ 3.1$ million for the quarter ended December 31, 2016.

1. Net interest and dividend income before provision for loan losses increased by $\$ 624$ thousand for the quarter ended December 31, 2017, compared to the quarter ended December 31, 2016. The increase is primarily due to higher average balances in the total loan portfolio. This increase was partially offset by higher funding costs and higher average deposit balances.

The components of total transactional income on purchased loans are set forth in the table below entitled "Total Return on Purchased Loans." When compared to the three months ended December 31, 2016, transactional income decreased by $\$ 1.0$ million. The total return on purchased loans for the three months ended December 31, 2017 was $11.0 \%$. The decrease over the prior comparable period was primarily due to lower accelerated accretion in the three months ended December 31, 2017. When compared to the six months ended December 31, 2016, transactional income increased by $\$ 432$ thousand. This increase over the prior comparable period was primarily due to higher loan fees in the six months ended December 31, 2017. The following table details the total return on purchased loans:

(1) The total return on purchased loans represents scheduled accretion, accelerated accretion, gains on asset sales, gains on real estate owned and other noninterest income recorded during the period divided by the average invested balance, which includes loans held for sale, on an annualized basis. The total return does not include the effect of purchased loan charge-offs or recoveries in the quarter. Total return is considered a non-GAAP financial measure.
2. Noninterest income decreased by $\$ 1.5$ million for the quarter ended December 31, 2017, compared to the quarter ended December 31, 2016, principally due to the following:

। A decrease in gain on sale of SBA loans of $\$ 1.4$ million, due to a lower amount of SBA loans sold in the quarter; and
। A decrease in gain on sale of residential loans held for sale of $\$ 82$ thousand, due to lower volume of residential loans sold in the quarter.
3. Noninterest expense decreased by $\$ 393$ thousand for the quarter ended December 31, 2017, compared to the quarter ended December 31, 2016, primarily due to the following:

1 A decrease in other noninterest expense of $\$ 395$ thousand, primarily due to a $\$ 330$ thousand decrease in expense related to the quarterly valuation of SBA servicing rights; and

1 A decrease in loan expense of $\$ 179$ thousand, largely driven by lower expense related to loan acquisition and refinance activity.
। The decreases in noninterest expense were partially offset by an increase in data processing fees of $\$ 214$ thousand, primarily due to the increased cost associated with outsourcing of data processing.
4. Income tax expense decreased by $\$ 458$ thousand for the quarter ended December 31, 2017, compared to the quarter ended December 31, 2016, primarily due to the following:

1 A decrease in the federal corporate income tax rate as a result of the Tax Cuts and Jobs Act signed into law on December 22, 2017, which resulted in a $\$ 762$ thousand decrease in federal income tax expense. Of this total, \$328 thousand was related to the decrease in the federal corporate income tax rate for the three months ended December 31,2017 and $\$ 434$ thousand was related to income tax expense previously recorded in the three months ended September 30, 2017, to arrive at the required blended federal corporate income tax rate of $28.0 \%$ for fiscal year 2018; and
। A decrease in income tax expense as a result of a $\$ 279$ thousand income tax benefit arising from the treatment of stock options exercised or vested restricted stock awards under ASU 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, whereby the tax effects of exercised options or vested awards are treated as a discrete item in the reporting period in which they occur.
। The decreases in income tax expense were partially offset by the impact of revaluing the deferred tax asset as a result of the change in the federal corporate income tax rate as well as the recording of current year changes in the deferred tax asset, which resulted in an increase in income tax expense of $\$ 498$ thousand.

As of December 31, 2017, nonperforming assets totaled $\$ 19.0$ million, or $1.84 \%$ of total assets, as compared to $\$ 18.7$ million, or $1.78 \%$ of total assets, as of September 30, 2017, and $\$ 14.8$ million, or $1.37 \%$ of total assets, as of June 30, 2017.

As of December 31, 2017, past due loans totaled $\$ 30.0$ million, or $3.87 \%$ of total loans, as compared to $\$ 12.1$ million, or $1.60 \%$ of total loans as of September 30, 2017, and $\$ 13.4$ million, or $1.72 \%$ of total loans as of June 30, 2017. The increase was primarily attributable to $\$ 5.3$ million of loans purchased in December that were delinquent at purchase, as well as $\$ 8.8$ million of loans that were 30 days past due as of December 31, 2017 and are now current.

As of December 31, 2017, the Company's Tier 1 Leverage Ratio was $13.4 \%$, compared to $12.8 \%$ at June 30, 2017, and the Total Capital Ratio was 20.3\%, compared to $19.5 \%$ at June 30, 2017. The increase in both the Tier 1 Leverage Ratio and the Total Capital Ratio resulted primarily from the increase in earnings and the net decrease in the loan portfolio.
