# NORTHEAST BANK Notes to Unaudited Financial Statements <br> March 31, 2023 

## 1. Basis of Presentation

The accompanying unaudited interim financial statements include the accounts of Northeast Bank (the "Bank"). These unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements. In the opinion of management, the accompanying financial statements contain all adjustments (consisting principally of normal recurring accruals) considered necessary for a fair presentation of the Bank's financial position, results of operations, and cash flows for the interim periods presented. These accompanying unaudited financial statements and notes should be read in conjunction with the audited financial statements and notes thereto for the fiscal year ended June 30, 2022 ("Fiscal 2022") included in the Bank's Annual Report on Form 10-K filed with the Federal Deposit Insurance Corporation ("FDIC").

## Funding and Capital

## At-the-Market Offering

To support the Bank's growth strategy, primarily for the purchase of loans during the quarter ended December 31, 2022 and for future loan growth opportunities, the Bank approved and initiated an at-the-market offering to sell up to $\$ 50.0$ million of voting common stock. During the quarter and nine months ended March 31, 2023, the Bank issued 160,106 shares at a weighted average net proceeds per share of $\$ 42.78$ and 193,611 shares at a weighted average net proceeds per share of $\$ 41.29$, which resulted in an increase of $\$ 6.9$ million and $\$ 8.0$ million to capital, respectively.

## Brokered Deposits

To support the funding needs of the Bank to execute on its growth strategies, including the purchase of loans during the quarter ended December 31, 2022, the Bank increased brokered time deposits from $\$ 50.1$ million at September 30, 2022 to $\$ 843.3$ million at December 31, 2022, which subsequently decreased to $\$ 744.1$ million at March 31, 2023. Brokered time deposits outstanding as of March 31, 2023 were for terms ranging from three to 12 months.

## 2. Recent Accounting Pronouncements

In June 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-13, Financial Instruments - Credit Losses (Topic 326) ("ASU 2016-13"). This guidance is intended to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. To achieve this objective, the amendments in this guidance replace the incurred loss impairment methodology in current U.S. GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. In November 2019, the FASB issued ASU 2019-10, Financial Instruments - Credit Losses (Topic 326), Derivatives and Hedging (Topic 815), and Leases (Topic 842): Effective Dates ("ASU 201910 "), which delays the effective date for ASU 2016-13 for smaller reporting companies, which allows the Bank to adopt the standard on July 1, 2023. Management has elected to delay the adoption of ASU 2016-13. Management has engaged an existing third-party service provider to assist in implementation and is in the process of identifying the methodologies necessary to implement the guidance.

In March 2020, the FASB issued ASU 2020-03, Codification Improvements to Financial Instruments ("ASU 2020-03"). This guidance provides updates on a wide variety of Topics in the Codification, including updates to the interaction of Topic 842 and Topic 326, and the interaction of Topic 326 and Subtopic 860-20. This ASU will be effective under the same effective dates as ASU 2016-13.

In March 2022, the FASB issued ASU 2022-02, Financial Instruments - Credit Losses (Topic 326) ("ASU 2022-02"). This guidance provides updates on Troubled Debt Restructurings ("TDRs") by Creditors and Vintage Disclosures. The amendments in this Update eliminate the accounting guidance for TDRs, while enhancing disclosure requirements for certain loan refinancings and restructurings by creditors when a borrower is experiencing financial difficulty. This ASU will be effective under the same effective dates as ASU 2016-13.

At March 31, 2023, the Bank held no securities of any single issuer (excluding the U. S. Government and federal agencies) with a book value that exceeded $10 \%$ of shareholders' equity.

When securities are sold, the adjusted cost of the specific security sold is used to compute the gain or loss on sale. There were no securities sold during the three or nine months ended March 31, 2023 or 2022. At March 31, 2023, securities with a fair value of $\$ 53.8$ million were pledged as collateral to secure potential or outstanding Federal Home Loan Bank of Boston ("FHLBB") advances.

The following summarizes the Bank's gross unrealized losses and fair values aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position.

There were no other-than-temporary impairment losses on securities during the three or nine months ended March 31, 2023 and 2022.
At March 31, 2023, all of the Bank's investment securities were issued or guaranteed by either government agencies or governmentsponsored enterprises. The change in fair value of the Bank's investment securities at March 31, 2023 is attributable to changes in interest rates.

The investments measured at net asset value include a fund that seeks to invest in securities either issued or guaranteed by the U.S. government or its agencies, as well as a fund that primarily invests in the federally guaranteed portion of SBA 7(a) loans that adjust quarterly or monthly and are indexed to the Prime Rate. The underlying composition of these funds is primarily government agencies, other investment-grade investments, or the guaranteed portion of SBA 7(a) loans, as applicable. As of March 31, 2023, the effective duration of the fund that seeks to invest in securities either issued or guaranteed by the U.S. government or its agencies is 4.53 years.

The amortized cost and fair values of available-for-sale debt securities by contractual maturity are shown below as of March 31, 2023. Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

## 4. Loans, Allowance for Loan Losses and Credit Quality

Loans are carried at the principal amounts outstanding or amortized acquired fair value in the case of acquired loans, adjusted by partial charge-offs and net of deferred loan costs or fees. Loan fees and certain direct origination costs are deferred and amortized into interest income over the expected term of the loan using the level-yield method. When a loan is paid off in full, the unamortized portion is recognized in interest income. Interest income is accrued based upon the daily principal amount outstanding, except for loans on nonaccrual status.

Loans purchased by the Bank are accounted for under ASC 310-30, Receivables-Loans and Debt Securities Acquired with Deteriorated Credit Quality ("ASC 310-30"). At acquisition, the effective interest rate is determined based on the discount rate that equates the present value of the Bank's estimate of cash flows with the purchase price of the loan. Prepayments are not assumed in determining a purchased loan's effective interest rate and income accretion. The application of ASC 310-30 limits the yield that may be accreted on the purchased loan, or the "accretable yield," to the excess of the Bank's estimate, at acquisition, of the expected undiscounted principal, interest, and other cash flows over the Bank's initial investment in the loan. The excess of contractually required payments receivable over the cash flows expected to be collected on the loan represents the purchased loan's "nonaccretable difference." Subsequent improvements in expected cash flows of loans with nonaccretable differences result in a prospective increase to the loan's effective yield through a reclassification of some, or all, of the nonaccretable difference to accretable yield. The effect of subsequent credit-related declines in expected cash flows of purchased loans are recorded through a specific allocation in the allowance for loan losses.

Loans are generally placed on nonaccrual status when they are past due 90 days as to either principal or interest, or when in management's judgment the collectability of interest or principal of the loan has been impaired. Loans accounted for under ASC 310-30 are placed on nonaccrual when it is not possible to reach a reasonable expectation of the timing and amount of cash flows to be collected on the loan. When a loan has been placed on nonaccrual status, previously accrued and uncollected interest is reversed against interest on loans. Interest on nonaccrual loans is accounted for on a cash-basis or using the cost-recovery method when collectability is doubtful. A loan is returned to accrual status when collectability of principal and interest is reasonably assured and the loan has performed for a reasonable period of time.

In cases where a borrower experiences financial difficulty and the Bank makes certain concessionary modifications to contractual terms, the loan is classified as a troubled debt restructuring ("TDR"), and therefore by definition is an impaired loan. Concessionary modifications may include adjustments to interest rates, extensions of maturity, and other actions intended to minimize economic loss and avoid foreclosure or repossession of collateral. The Bank began offering short-term loan modifications to assist borrowers during the COVID-19 national emergency. For loans accounted for under ASC 310-30, the Bank evaluates whether it has granted a concession by comparing the restructured debt terms to the expected cash flows at acquisition plus any additional cash flows expected to be collected arising from changes in estimate after acquisition. As a result, if an ASC 310-30 loan is modified to be consistent with, or better than, the Bank's expectations at acquisition, the modified loan would not qualify as a TDR. Nonaccrual loans that are restructured generally remain on nonaccrual status for a minimum period of six months to demonstrate that the borrower can meet the restructured terms. If the restructured loan is on accrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status. If the borrower's ability to meet the revised payment schedule is not reasonably assured, the loan is classified as a nonaccrual loan. With limited exceptions, loans classified as TDRs remain classified as such until the loan is paid off.

The composition of the Bank's loan portfolio is as follows on the dates indicated:

## Allowance for Loan Losses and Impaired Loans

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. For residential and consumer loans, a charge-off is recorded no later than the point at which a loan is 180 days past due if the loan balance exceeds the fair value of the collateral, less estimated costs to sell. For commercial loans, a charge-off is recorded on a case-by-case basis when all or a portion of the loan is deemed to be uncollectible. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses consists of general and specific reserves and reflects management's estimate of probable loan losses inherent in the loan portfolio at the balance sheet date. Management uses a consistent and systematic process and methodology to evaluate the appropriateness of the allowance for loan losses on a quarterly basis. The calculation of the allowance for loan losses is segregated by portfolio segments, which include: residential real estate, commercial real estate, commercial and industrial, consumer, purchased loans, and SBA loans. Risk characteristics relevant to each portfolio segment are as follows:

Commercial real estate: Loans in this segment are primarily income-producing properties. For owner-occupied properties, the cash flows are derived from an operating business, and the underlying cash flows may be adversely affected by deterioration in the financial condition of the operating business. The underlying cash flows generated by nonowner-occupied properties may be adversely affected by increased vacancy rates. Management periodically obtains rent rolls and operating statements, with which it monitors the cash flows of these loans. Adverse developments in either of these areas will have an adverse effect on the credit quality of this segment. For purposes of the allowance for loan losses, this segment also includes construction loans.

Commercial and industrial: Loans in this segment are made to businesses and are generally secured by the assets of the business. Repayment is expected from the cash flows of the business. This segment also includes loans to non-bank lenders, which are generally secured by a collateral assignment of the notes and mortgages on loans originated by the non-bank lenders. Weakness in national or regional economic conditions, and a corresponding weakness in consumer or business spending, will have an adverse effect on the credit quality of this segment.

Purchased: Loans in this segment are typically secured by commercial real estate, multi-family residential real estate, or business assets and have been acquired by the Bank's National Lending Division. Loans acquired by the National Lending Division are, with limited exceptions, performing loans at the date of purchase. Repayment of loans in this segment is largely dependent on cash flow from the successful operation of the property, in the case of nonowner-occupied property, or operating business, in the case of
owner-occupied property. Loan performance may be adversely affected by factors affecting the general economy or conditions specific to the real estate market, such as geographic location or property type. Loans in this segment are evaluated for impairment under ASC 310-30. The Bank reviews expected cash flows from purchased loans on a quarterly basis. The effect of a decline in expected cash flows subsequent to the acquisition of the loan is recognized through a specific allocation in the allowance for loan losses.

SBA: Loans in this segment are comprised of both commercial real estate and commercial and industrial loans to small businesses, underwritten and originated by the Bank's national SBA group ("SBA Division"). Loans are underwritten and originated primarily in accordance with SBA 7(a) guidelines and are partially guaranteed by the SBA. Loans are primarily secured by income-producing properties and/or assets of the businesses or borrowers. Adverse developments in national or regional economic conditions, and a corresponding weakness in consumer or business spending, will have an adverse effect on the credit quality of this segment.

Residential real estate: All loans in this segment are collateralized by residential real estate and repayment is primarily dependent on the credit quality, loan-to-value ratio and income of the individual borrower. The overall health of the economy, particularly unemployment rates and housing prices, has a significant effect on the credit quality in this segment. For purposes of the Bank's allowance for loan loss calculation, home equity loans and lines of credit are included in residential real estate.

Consumer: Loans in this segment are generally secured, and repayment is dependent on the credit quality of the individual borrower. Repayment of consumer loans is generally based on the earnings of individual borrowers, which may be adversely impacted by regional labor market conditions.

The general component of the allowance for loan losses for originated loans is based on historical loss experience adjusted for qualitative factors stratified by loan segment. The Bank does not weight periods used in that analysis to determine the average loss rate in each portfolio segment. This historical loss factor is adjusted for the following qualitative factors:

- Levels and trends in delinquencies;
- Trends in the volume and nature of loans;
- Trends in credit terms and policies, including underwriting standards, procedures and practices, and the experience and ability of lending management and staff;
- Trends in portfolio concentration;
- National and local economic trends and conditions;
- Effects of changes or trends in internal risk ratings; and
- Other effects resulting from trends in the valuation of underlying collateral.

The allocated component of the allowance for loan losses relates to loans that are classified as impaired. Impairment is measured on a loan-by-loan basis by either the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral less estimated costs to sell if the loan is collateral dependent. An allowance is established when the discounted cash flows or collateral value of the impaired loan is lower than the carrying value of the loan.

For all portfolio segments, except loans accounted for under ASC 310-30, a loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-bycase basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. For the purchased loan segment, a loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to realize cash flows as expected at acquisition. For loans accounted for under ASC 310-30 for which cash flows can reasonably be estimated, loan impairment is measured based on the decrease in expected cash flows from those estimated at acquisition, excluding changes due to changes in interest rate indices and other non-credit related factors, discounted at the loan's effective interest rate assumed at acquisition. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting the scheduled principal and interest payments when due.

## Credit Quality

The Bank utilizes a ten-point internal loan rating system for commercial real estate, construction, commercial and industrial, and certain residential loans as follows:

Loans rated 1-6: Loans in these categories are considered "pass" rated loans. Loans in categories 1-5 are considered to have low to average risk. Loans rated 6 are considered marginally acceptable business credits and have more than average risk.

Loans rated 7: Loans in this category are considered "special mention." These loans show signs of potential weakness and are being closely monitored by management.

Loans rated 8: Loans in this category are considered "substandard." Loans classified as substandard are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified have a well-defined weakness or weaknesses that jeopardize the orderly repayment of the debt.

Loans rated 9: Loans in this category are considered "doubtful." Loans classified as doubtful have all the weaknesses inherent in one graded 8 with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Loans rated 10: Loans in this category are considered "loss" and of such little value that their continuance as loans is not warranted.
On an annual basis, or more often if needed, the Bank formally reviews the credit quality and ratings of all loans subject to risk ratings. Annually, the Bank engages an independent third-party to review a significant portion of loans within these segments. Management uses the results of these reviews as part of its annual review process. Risk ratings on purchased loans, with and without evidence of credit deterioration at acquisition, are determined relative to the Bank's recorded investment in that loan, which may be significantly lower than the loan's unpaid principal balance.

The following tables present the Bank's loans by risk rating.

As of March 31, 2023, there was a further commitment to lend to a borrower associated with loans modified in a TDR totaling \$55 thousand.

The Bank considers TDRs past due 90 days or more to be in payment default. No loans modified in a TDR in the last twelve months defaulted during the three and nine months ended March 31, 2023 and 2022.

Certain loans accounted for under ASC 310-30 that were acquired by the Bank are not accounted for using the income recognition model because the Bank cannot reasonably estimate cash flows expected to be collected. These loans when acquired are placed on nonaccrual status. The carrying amounts of such loans are as follows.

## 5. Borrowings

## Short-term Federal Home Loan Bank Advances

At March 31, 2023, the Bank had $\$ 132.0$ million in short-term FHLBB advances maturing on April 3, 2023 at a weighted average rate of $4.89 \%$. At June 30, 2022, the Bank had $\$ 15.0$ million in short-term FHLBB advances maturing on July 5, 2022 at a weighted average rate of $0.87 \%$.

## Long-term Federal Home Loan Bank Advances

At March 31, 2023, the Bank had two long-term FHLBB advances totaling $\$ 256.6$ million. There were no long-term FHLBB advances outstanding at June 30, 2022. The advances consist of one fixed-rate advance for $\$ 15.0$ million, which matures on June 21, 2027 and one amortizing advance for $\$ 241.6$ million, which matures on January 3, 2028. The weighted average interest rate on long-term FHLBB advances was $4.12 \%$ as of March 31, 2023.

At March 31, 2023, no FHLBB advances were subject to call provisions and as such, may not be called prior to the stated maturity. Certain mortgage loans and available-for-sale securities, free of liens, pledges and encumbrances have been pledged under a blanket agreement to secure these advances. The Bank is required to own stock in the FHLBB in order to borrow from the FHLBB.

At March 31, 2023, the Bank had approximately $\$ 521.1$ million of additional capacity to borrow from the FHLBB, compared to $\$ 150.4$ million as of June 30, 2022.

## Capital Leases

During the quarter ended December 31, 2022, the Bank capitalized a lease for its corporate space located in Boston, Massachusetts. As a result of this new lease, the Bank capitalized $\$ 17.5$ million during the quarter. The new lease has a 12 -year term and includes a rent-free period. The Bank utilized a discount rate of $5.10 \%$, which approximates the borrowing rate for an FHLBB advance for a similar term.

## 6. Earnings Per Share (EPS)

EPS is computed by dividing net income allocated to common shareholders by the weighted-average common shares outstanding. The following table shows the weighted-average number of common shares outstanding for the periods indicated. Shares issuable relative to stock options granted have been reflected as an increase in the shares outstanding used to calculate diluted EPS, after applying the treasury stock method.

The number of shares outstanding for basic and diluted EPS is presented as follows:

|  | Three Months Ended March 31, |  |  |  | Nine Months Ended March 31, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Effect of dilutive unvested restricted stock awards |  | 61,365 |  | 22,853 |  | 45,306 |  | 10,793 |
| Weighted average shares used in calculation of diluted EPS |  | 7,413,812 |  | 7,790,963 |  | 7,377,236 |  | 7,998,221 |
| Basic earnings per common share | \$ | 1.70 | \$ | 1.38 | \$ | 4.39 | \$ | 4.03 |
| Diluted earnings per common share | \$ | 1.69 | \$ | 1.36 | \$ | 4.35 | \$ | 3.98 |

No stock options were excluded from the calculation of diluted EPS due to the exercise price for the three and nine months ended March 31, 2023 and 2022.

## 7. Derivatives and Hedging Activities

The Bank had stand-alone derivative financial instruments in the form of swap agreements that derive their value from the underlying interest rate. These transactions involve both credit and market risk. The notional amounts are amounts on which calculations, payments and the value of the derivative are based. Notional amounts do not represent direct credit exposures. Direct credit exposure arises in the event of nonperformance by the counterparties to these agreements and is limited to the net difference between the calculated amounts to be received and paid, if any. Such differences, which represent the fair value of the derivative instruments, are reflected on the Bank's balance sheet as derivative assets and derivative liabilities. The Bank controls the credit risk of its financial contracts through credit approvals, limits and monitoring procedures, and does not expect any counterparties to fail to meet their obligations.

The Bank previously held derivative instruments that contain credit-risk related features that are in a net liability position, which may require that collateral be assigned to dealer banks. At June 30, 2022, the Bank had posted cash collateral totaling $\$ 2.5$ million with dealer banks related to derivative instruments in a net liability position. The Bank had no cash posted for collateral at March 31, 2023.

The Bank does not offset fair value amounts recognized for derivative instruments. The Bank does not net the amount recognized for the right to reclaim cash collateral against the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement.

The Bank evaluates the effectiveness of entering into any derivative instrument agreement by measuring the cost of such an agreement in relation to the reduction in net income volatility within an assumed range of interest rates.

## Interest Rate Risk Management-Cash Flow Hedging Instruments

The Bank uses variable rate debt as a source of funds for use in the Bank's lending and investment activities and other general business purposes. These debt obligations expose the Bank to variability in interest payments due to changes in interest rates. If interest rates increase, interest expense increases. Conversely, if interest rates decrease, interest expense decreases. Management believes it is prudent to limit the variability of a portion of its interest payments and, therefore, generally hedges a portion of its variable-rate interest payments.

Information pertaining to outstanding swap agreements is as follows as of June 30, 2022.

During the quarter ended September 30, 2022, the Bank terminated interest rate swap agreements totaling $\$ 15.0$ million prior to maturity and recorded a gain on the termination of interest rate swaps of $\$ 96$ thousand. During the quarter ended March 31, 2022, no interest rate swap agreements were terminated prior to maturity. Changes in the fair value of interest rate swaps designated as hedging instruments of the variability of cash flows associated with variable rate debt are reported in other comprehensive income. These amounts subsequently are reclassified into interest expense as a yield adjustment in the same period in which the related interest on the debt affects earnings. Risk management results for the three months ended March 31, 2022 related to the balance sheet hedging of variable rate debt indicates that the hedges were effective.

## 8. Other Comprehensive Income

The components of other comprehensive income (loss) are as follows:

|  | Three Months Ended March 31, |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Accumulated other comprehensive loss | \$ | (628) | \$ | (850) |

## 9. Commitments and Contingencies

## Commitments

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit, standby letters of credit, and commitments to fund investments. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the balance sheets. The contract amounts of those instruments reflect the extent of involvement the Bank has in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Financial instruments with contractual amounts which represent credit risk are as follows:

[^0]| March 31, 2023 |  | June 30, 2022 |  |
| :---: | :---: | :---: | :---: |
| (Dollars in thousands) |  |  |  |
| \$ | 50,460 | \$ | 9,398 |
|  | 40,229 |  | 30,495 |

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the counter party. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties. The Bank has recorded an allowance for possible losses on commitments and unfunded loans totaling \$136 thousand and \$71 thousand recorded in other liabilities at March 31, 2023 and June 30, 2022, respectively.

## Contingencies

The Bank is party to litigation and claims arising in the normal course of business. Management believes that the liabilities, if any, arising from such litigation and claims will not be material to the Bank's financial position or results of operations.

## 10. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. The Bank uses prices and inputs that are current as of the measurement date, including during periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from one level to another. When market assumptions are not readily available, the Bank's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. If there has been a significant decrease in the volume and level of activity for the asset or liability, regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same.

ASC 820, Fair Value Measurement, defines fair value and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 - Valuations based on significant observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 - Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.
To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Bank in determining fair value is greatest for
instruments categorized in Level 3. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Valuation techniques - There have been no changes in the valuation techniques used during the current period.
Transfers - There were no transfers of assets and liabilities measured at fair value on a recurring or nonrecurring basis during the current period.

## Assets and Liabilities Measured at Fair Value on a Recurring Basis:

Securities - Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Examples of such instruments include publicly-traded common and preferred stocks. If quoted prices are not available, then fair values are estimated by using pricing models (i.e., matrix pricing) and market interest rates and credit assumptions or quoted prices of securities with similar characteristics and are classified within Level 2 of the valuation hierarchy. Examples of such instruments include government agency and government-sponsored enterprise mortgage-backed securities, as well as certain preferred and trust preferred stocks. Level 3 securities are securities for which significant unobservable inputs are utilized.

Certain investments are measured at fair value using the net asset value per share as a practical expedient. These investments include a fund that seeks to invest in securities either issued or guaranteed by the U.S. government or its agencies, as well as a fund that primarily invests in the federally-guaranteed portion of SBA 7(a) loans. The Bank's investment in securities either issued or guaranteed by the U.S. government or its agencies can be redeemed daily at the closing net asset value per share. The Bank's investment in SBA 7(a) loans can be redeemed quarterly with sixty days' notice. In accordance with ASU 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value Per Share (Or Its Equivalent), these investments have not been included in the fair value hierarchy.

Derivative financial instruments - The valuation of the Bank's interest rate swaps are determined using widely accepted valuation techniques including discounted cash flow analyses on the expected cash flows of derivatives. These analyses reflect the contractual terms of the derivatives, including the period to maturity, and use observable market-based inputs, including forward interest rate curves and implied volatilities. Unobservable inputs, such as credit valuation adjustments are insignificant to the overall valuation of the Bank's derivative financial instruments. Accordingly, the Bank has determined that its interest rate derivatives fall within Level 2 of the fair value hierarchy.

The fair value of derivative loan commitments and forward loan sale agreements are estimated using the anticipated market price based on pricing indications provided from syndicate banks. These commitments and agreements are categorized as Level 2. The fair value of such instruments was nominal at each date presented.

## Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis:

Collateral dependent impaired loans - Valuations of impaired loans measured at fair value are determined by a review of collateral values. Certain inputs used in appraisals are not always observable, and therefore impaired loans are generally categorized as Level 3 within the fair value hierarchy.

Real estate owned and other repossessed collateral - The fair values of real estate owned and other repossessed collateral are estimated based upon appraised values less estimated costs to sell. Certain inputs used in appraisals are not always observable, and therefore may be categorized as Level 3 within the fair value hierarchy. When inputs used in appraisals are primarily observable, they are classified as Level 2.

Loan servicing rights - The fair value of the SBA and mortgage servicing rights is based on a valuation model that calculates the present value of estimated future net servicing income. Adjustments are only recorded when the discounted cash flows derived from the valuation model are less than the carrying value of the asset. Certain inputs are not observable, and therefore loan servicing rights are generally categorized as Level 3 within the fair value hierarchy.

Fair Value of other Financial Instruments:
Cash and cash equivalents - The fair value of cash, due from banks, interest-bearing deposits and Federal Home Loan Bank of Boston ("FHLBB") overnight deposits approximates their relative book values, as these financial instruments have short maturities.

FHLBB stock - The carrying value of FHLBB stock approximates fair value based on redemption provisions of the FHLBB.
Loans - Fair values are estimated for portfolios of loans with similar financial characteristics. The fair value of performing loans is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect
the credit and interest rate risk inherent in the loan. The estimates of maturity are based on the Bank's historical experience with repayments for each loan classification, modified, as required, by an estimate of the effect of current economic conditions, lending conditions and the effects of estimated prepayments.

Loans held for sale - The fair value of loans held-for-sale is estimated based on bid quotations received from loan dealers.

Interest receivable - The fair value of this financial instrument approximates the book value as this financial instrument has a short maturity. It is the Bank's policy to stop accruing interest on loans past due by more than 90 days. Therefore, this financial instrument has been adjusted for estimated credit losses.

Deposits - The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings, NOW accounts and money market accounts, is equal to the amount payable on demand. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. The fair value estimates do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market. If that value were considered, the fair value of the Bank's net assets could increase.

FHLBB advances, lease liabilities and subordinated debentures - The fair value of the Bank's borrowings with the FHLBB is estimated by discounting the cash flows through maturity or the next re-pricing date based on current rates available to the Bank for borrowings with similar maturities. The fair value of the Bank's lease liabilities and subordinated debentures are estimated by discounting the cash flows through maturity based on current rates available to the Bank for borrowings with similar maturities.

Off-Balance Sheet Credit-Related Instruments - Fair values for off-balance-sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair value of such instruments was nominal at each date presented.

Assets and liabilities measured at fair value on a recurring basis are summarized below.

${ }^{(1)}$ In accordance with ASU 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. The fair value amount presented in the table is intended to permit reconciliation of the fair value amount to the financial statements.

Assets measured at fair value on a nonrecurring basis are summarized below.

(1) Fair value is generally determined through independent appraisals of the underlying collateral. The Bank may also use another available source of collateral assessment to determine a reasonable estimate of the fair value of the collateral. Appraisals may be adjusted by management for qualitative factors such as economic factors and estimated liquidation expenses. The range of these possible adjustments was $25 \%$ to $33 \%$.
(2) Fair value is determined using a discounted cash flow model. The unobservable inputs include anticipated rate of loan prepayments and discount rates. The range of prepayment assumptions used was $0.00 \%$ to $34.0 \%$. For discount rates, the range was $2.4 \%$ to $27.0 \%$.

The table below summarizes the total gains (losses) on assets measured at fair value on a non-recurring basis for the three and nine months ended March 31, 2023 and 2022.

The following table presents the estimated fair value of the Bank's financial instruments.

${ }^{(1)}$ In accordance with ASU 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. The fair value amount presented in the table is intended to permit reconciliation of the fair value amount to the financial statements.

## 11. Subsequent Events

The Bank evaluated for subsequent events through the date the financial statements were issued. There have been no subsequent events that occurred during such period that would require adjustment to or disclosure in the financial statements as of and for the quarter ended March 31, 2023.

The following discussion should be read in conjunction with the financial statements, notes and tables included in Northeast Bank's (the "Bank's") Annual Report on Form 10-K for the fiscal year ended June 30, 2022, filed with the Federal Deposit Insurance Corporation ("FDIC").

## A Note about Forward Looking Statements

This report contains certain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended, such as statements relating to the financial condition, prospective results of operations, future performance or expectations, plans, objectives, prospects, loan loss allowance adequacy, simulation of changes in interest rates, capital spending, finance sources and revenue sources of Northeast Bank ("we," "our," "us," "Northeast" or the "Bank"). These statements relate to expectations concerning matters that are not historical facts. Accordingly, statements that are based on management's projections, estimates, assumptions, and judgments constitute forward-looking statements. These forward looking statements, which are based on various assumptions (some of which are beyond the Bank's control), may be identified by reference to a future period or periods, or by the use of forward-looking terminology such as "believe", "expect", "estimate", "anticipate", "continue", "plan", "approximately", "intend", "objective", "goal", "project", or other similar terms or variations on those terms, or the future or conditional verbs such as "will", "may", "should", "could", and "would".

Such forward-looking statements reflect the Bank's current views and expectations based largely on information currently available to the Bank's management, and on the Bank's current expectations, assumptions, plans, estimates, judgments, and projections about the Bank's business and industry, and they involve inherent risks and uncertainties. Although the Bank believes that these forward-looking statements are based on reasonable estimates and assumptions, they are not guarantees of future performance and are subject to known and unknown risks, uncertainties, contingencies, and other factors. Accordingly, the Bank cannot give you any assurance that its expectations will in fact occur or that its estimates or assumptions will be correct. The Bank cautions you that actual results could differ materially from those expressed or implied by such forward-looking statements as a result of, among other factors, deterioration in employment levels, general business and economic conditions on a national basis and in the local markets in which the Bank operates; changes in customer behavior due to changing business and economic conditions, including concerns about inflation and concerns about liquidity; the possibility that future credits losses are higher than currently expected due to changes in economic assumptions, customer behavior or adverse economic developments; turbulence in the capital and debt markets; changes in interest rates and real estate values; competitive pressures from other financial institutions; changes in loan defaults and charge-off rates; changes in the value of securities and other assets, adequacy of loan loss reserves, or deposit levels necessitating increased borrowing to fund loans and investments; changing government regulation; changes in information technology, cybersecurity incidents, fraud, natural disasters, war, terrorism, civil unrest, and future pandemics; the risk that the Bank may not be successful in the implementation of its business strategy; the risk that intangibles recorded in the Bank's financial statements will become impaired; and the other risks and uncertainties detailed in the Bank's Annual Report on Form 10-K for the fiscal year ended June 30, 2022 as updated in the Bank's Quarterly Reports on Form 10-Q and other filings submitted to the FDIC. These forward-looking statements speak only as of the date of this report and the Bank does not undertake any obligation to update or revise any of these forward-looking statements to reflect events or circumstances occurring after the date of this report or to reflect the occurrence of unanticipated events.

## Description of Business and Strategy

## Business Overview

Northeast Bank, a Maine state-chartered bank originally organized in 1872, is a full-service financial institution.

As of March 31, 2023, the Bank had total assets of $\$ 2.87$ billion, total deposits of $\$ 2.13$ billion, and shareholders' equity of $\$ 283.9$ million. We gather retail deposits through our seven full-service branches in Maine and through our online deposit program, ableBanking; originate loans through the Community Banking Division; and purchase and originate commercial loans, typically secured by real estate, on a nationwide basis through our National Lending Division.

## Strategy

The Bank's goal is to prudently grow its franchise, while maintaining sound operations and risk management, by means of the following strategies:

Continuing to grow the National Lending Division's national originated and purchased loan business. We purchase primarily commercial real estate loans nationally, at prices that on average have produced yields significantly higher than those available on our originated loan portfolio. We also originate loans nationally, taking advantage of our core expertise in underwriting and servicing national credits.

Continuing our community banking tradition. With a history that dates back to 1872, our Community Banking Division maintains its focus on sales and service, with the goal of attracting and retaining deposits, and serving the lending needs of retail and commercial customers within our core markets.

Generating deposits to fund our business. We offer a full line of deposit products through our seven-branch network located in the Community Banking Division's market. ableBanking is a direct savings platform providing an additional channel to raise core deposits to fund our asset strategy.

## Critical Accounting Policies and Estimates

Critical accounting policies are those that involve significant judgments and assessments by management, and which could potentially result in materially different results under different assumptions and conditions. The reader is encouraged to review each of the policies discussed in our Annual Report on Form 10-K for the year ended June 30, 2022, filed with the FDIC, to gain a better understanding of how the Bank's financial performance is measured and reported. There has been no material change in critical accounting policies during the three and nine months ended March 31, 2023.

## Overview

Net income increased by $\$ 1.9$ million to $\$ 12.5$ million for the quarter ended March 31,2023 , compared to net income of $\$ 10.6$ million for the quarter ended March 31, 2022. The increase was primarily due to higher net interest income, partially offset by higher provision (credit) for loan losses, lower correspondent fee income and higher salaries expense, professional fees, deposit insurance expense, and data processing fees.

Net income increased by $\$ 235$ thousand to $\$ 32.1$ million for the nine months ended March 31, 2023, compared to net income of $\$ 31.9$ million for the nine months ended March 31, 2022. The increase was primarily due to higher net interest income, partially offset by higher provision (credit) for loan losses, lower correspondent fee income, higher noninterest expense amounts, and higher income tax expense.

## Financial Condition

## Overview

As of March 31, 2023, total assets were $\$ 2.87$ billion, an increase of $\$ 1.28$ billion, or $81.1 \%$, from total assets of $\$ 1.58$ billion as of June 30 , 2022, primarily due to a $\$ 1.20$ billion increase in loans. The principal components of the changes in the balance sheet follow:

## Assets

Cash and Due from Banks, Short-Term Investments and Securities
Cash and cash equivalents were $\$ 216.6$ million as of March 31, 2023, an increase of $\$ 44.5$ million, or $25.9 \%$, from $\$ 172.1$ million at June 30, 2022.

Securities totaled $\$ 60.6$ million as of March 31, 2023, compared to $\$ 61.7$ million as of June 30, 2022, representing a decrease of $\$ 1.1$ million, or $1.8 \%$, primarily due to principal payments on mortgage-backed securities. Included in investment securities are securities issued by government agencies and government-sponsored enterprises, as well as an investment of $\$ 5.1$ million in a Community Reinvestment Act ("CRA") qualified fund that seeks to invest in securities either issued or guaranteed by the U.S. government or its agencies and an investment of $\$ 1.7$ million in a CRA qualified fund that primarily invests in the federally guaranteed portion of SBA 7(a) loans. At March 31, 2023, securities with a fair value of $\$ 53.8$ million were pledged for potential and outstanding FHLBB borrowings.

## Loans

The following table highlights the changes in the loan portfolio for the three and nine months ended March 31, 2023:

Loans generated by the National Lending Division for the quarter ended March 31, 2023 totaled $\$ 138.6$ million, which consisted of $\$ 21.5$ million of purchased loans, at an average price of $90.6 \%$ of unpaid principal balance, and $\$ 117.1$ million of originated loans.

(1) The total return on purchased loans represents scheduled accretion, accelerated accretion, gains on real estate owned and other noninterest income recorded during the period divided by the average invested balance, which includes purchased loans held for sale, on an annualized basis. The total return on purchased loans does not include the effect of purchased loan charge-offs or recoveries during the period. Total return on purchased loans is considered a non-GAAP financial measure. See reconciliation in below table entitled "Total Return on Purchased Loans."

The Bank's loan portfolio (excluding loans held for sale) by lending division follows:

## Classification of Assets

Loans are classified as nonperforming when 90 or more days past due, unless a loan is well-secured and in the process of collection. Loans less than 90 days past due, for which collection of principal or interest is considered doubtful, also may be designated as nonperforming. In both situations, accrual of interest ceases. The Bank typically maintains such loans as nonperforming until the respective borrowers have demonstrated a sustained period of payment performance.

In cases where a borrower experiences financial difficulty and the Bank makes certain concessionary modifications, the loan is classified as a troubled debt restructuring ("TDR"). Concessionary modifications may include adjustments to interest rates, extensions of maturity, or other actions intended to minimize economic loss and avoid foreclosure or repossession of collateral. Nonaccrual loans that are restructured generally remain on nonaccrual status for a minimum period of six months to demonstrate that the borrower can meet the restructured terms. If the restructured loan is on accrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status. If the borrower's ability to meet the revised payment schedule is not reasonably assured, the loan is classified as a nonaccrual loan. With limited exceptions, a loan classified as a TDR remains classified as such until the loan is paid off.

Other nonperforming assets include other real estate owned ("OREO") and other personal property securing loans repossessed by the Bank. The real estate and personal property collateral for commercial and consumer loans is recorded at fair value less estimated costs to sell upon repossession. Revenues and expenses are recognized in the period when received or incurred on OREO and in-substance foreclosures. Gains and losses on disposition are recognized in noninterest income.

The following table details the Bank's nonperforming assets and other credit quality indicators as of March 31, 2023 and June 30, 2022. Management believes that, based on their carrying amounts, nonperforming assets are well secured based on the estimated fair value of underlying collateral.

| On accrual status |  |  |  |  | \$ | 23,165 |
| Nonaccrual status |  |  |  |  | \$ | 4,357 |

As of March 31, 2023, nonperforming assets totaled $\$ 14.5$ million, or $0.51 \%$ of total assets, compared to $\$ 12.9$ million, or $0.82 \%$ of total assets, as of June 30, 2022. The increase was primarily due to six National Lending Division loans totaling $\$ 4.3$ million that were placed on nonaccrual status, partially offset by two National Lending Division loans totaling $\$ 2.5$ million that paid off during the nine months ended March 31, 2023.

## Allowance for Loan Losses

The allowance for loan losses is maintained at a level that management considers adequate to provide for probable loan losses based upon evaluation of known and inherent risks in the loan portfolio. The allowance is increased by providing for loan losses through a charge to expense and by recoveries of loans previously charged-off and is reduced by loans being charged-off.

The Bank's allowance for loan losses amounted to $\$ 7.1$ million as of March 31, 2023, compared to $\$ 5.0$ million as of June 30, 2022. The increase in the period is primarily the result of loan growth, an increase in general qualitative factors in the commercial real estate segment, and an increase in specific reserves during the period.

The following table details ratios related to the allowance for loan losses for the periods indicated.

[^1]

| June 30, 2022 |
| :---: |
| $38.84 \%$ |
| $0.39 \%$ |
| $(0.02 \%)$ |

| March 31, 2022 |
| :---: |
| $32.47 \%$ |
| $0.47 \%$ |
| $(0.04 \%)$ |

While management believes that it uses the best information available to make its determinations with respect to the allowance, there can be no assurance that the Bank will not have to increase its provision for loan losses in the future as a result of changing economic conditions, adverse markets for real estate or other factors.

## Other Assets

Premises and equipment, net, increased by $\$ 17.4$ million, or $180.7 \%$, to $\$ 27.0$ million at March 31,2023 , compared to $\$ 9.6$ million at June 30, 2022. The increase was primarily due to the capitalization of a right-of-use asset related to the new office space in Boston, Massachusetts for $\$ 17.5$ million.

Loan servicing rights, net totaled $\$ 1.7$ million and $\$ 1.3$ million at March 31, 2023 and June 30, 2022, respectively. The $\$ 366$ thousand increase was the result of the Bank acquiring servicing rights through the purchase of an SBA pool totaling $\$ 970$ thousand and the revaluation of the servicing rights performed on a quarterly basis, which resulted in a $\$ 250$ thousand recovery recognized during the nine months ended March 31, 2023, partially offset by SBA loan payoffs and amortization.

The cash surrender value of the Bank's bank-owned life insurance ("BOLI") assets increased $\$ 328$ thousand, or $1.8 \%$ to $\$ 18.3$ million at March 31, 2023, compared to $\$ 17.9$ million at June 30, 2022. The increase in cash surrender value was due to interest earnings. Increases in cash surrender value are recognized in noninterest income and are not subject to income taxes. Borrowing on, or surrendering a policy, may subject the Bank to income tax expense on the increase in cash surrender value. For these reasons, management considers BOLI an illiquid asset. BOLI represented $6.3 \%$ of the Bank's regulatory total capital at March 31, 2023.

## Deposits, FHLBB Advances, Liquidity, and Capital

## Deposits

The Bank's principal source of funding is its core deposit accounts. At March 31, 2023, non-maturity accounts and non-brokered insured time deposits represented $62.8 \%$ of total deposits.

Total deposits increased by $\$ 841.2$ million, or $65.3 \%$, from June 30, 2022. The increase was attributable to increases in time deposits of $\$ 883.9$ million, or $694.3 \%$, and savings and interest checking deposits of $\$ 108.6$ million, or $18.6 \%$, partially offset by a decrease in demand deposits of $\$ 153.9$ million, or $46.8 \%$. The primary reason for the net increase in deposits was due to the increase in brokered time deposits, which increased to $\$ 744.1$ million compared to none outstanding at June 30, 2022. The use of brokered time deposits is part of the Bank's strategy to fund loan purchases in the short-term. The decrease in demand deposits was primarily due to a $\$ 165.0$ million decrease in the Paycheck Protection Program ("PPP") Liquidity Facility balance during the nine months ended March 31, 2023 as the balance of PPP loans purchased by ACAP SME, LLC that remain outstanding has decreased significantly during this period.

The composition of total deposits at March 31, 2023 and June 30, 2022 is as follows:

|  | March 31, 2023 |  |  | June 30, 2022 |  |  |

## FHLBB Advances

## Short-term Federal Home Loan Bank Advances

At March 31, 2023, the Bank had $\$ 132.0$ million in short-term FHLBB advances maturing on April 3, 2023 at a weighted average rate of $4.89 \%$. At June 30, 2022, the Bank had $\$ 15.0$ million in short-term FHLBB advances maturing on July 5, 2022 at a weighted average rate of $0.87 \%$.

## Long-term Federal Home Loan Bank Advances

At March 31, 2023, the Bank had two long-term FHLBB advances totaling $\$ 256.6$ million. There were no long-term FHLBB advances outstanding at June 30, 2022. The advances consist of one fixed-rate advance for $\$ 15.0$ million, which matures on June 21, 2027 and one amortizing advance for $\$ 241.6$ million, which matures on January 3, 2028. The weighted average interest rate on long-term FHLBB advances was $4.12 \%$ as of March 31, 2023.

As of March 31, 2023, the Bank had pledged certain residential and commercial real estate loans to secure outstanding advances and provide additional borrowing capacity. As of March 31, 2023, securities with a fair value of $\$ 53.8$ million were pledged for potential and outstanding borrowings.

Retail deposits and other core deposit sources including deposit listing services are used by the Bank to manage its overall liquidity position. We have the ability to raise wholesale funding such as FHLBB advances and brokered deposits, which remains an important part of our liquidity contingency planning. While we closely monitor and forecast our liquidity position, it is affected by asset growth, deposit withdrawals and meeting other contractual obligations and commitments. The accuracy of our forecast assumptions may increase or decrease our overall available liquidity. To utilize the FHLBB advance capacity, the purchase of additional capital stock of the FHLBB may be required.

At March 31, 2023, the Bank had $\$ 1.17$ billion of immediately accessible liquidity, defined as cash that the Bank reasonably believes could be raised within seven days through collateralized borrowings, brokered deposits or security sales. This position represented $40.7 \%$ of total assets. The Bank also had $\$ 216.6$ million of cash and cash equivalents at March 31, 2023.

Management believes that there are adequate funding sources to meet its liquidity needs for the foreseeable future. Primary funding sources are the repayment of principal and interest on loans, the renewal of time deposits, the potential for growth in the deposit base, and the credit availability from the FHLBB. Management does not believe that the terms and conditions that will be present at the renewal of these funding sources will significantly impact the Bank's operations, due to its management of the maturities of its assets and liabilities.

## Capital

At March 31, 2023, shareholders' equity was $\$ 283.9$ million, an increase of $\$ 35.6$ million, or $14.3 \%$ from June 30, 2022. Book value per outstanding common share was $\$ 37.02$ at March 31, 2023 and $\$ 33.37$ at June 30, 2022.

As of March 31, 2023, the Bank's Tier 1 leverage capital ratio was $10.1 \%$, compared to $16.1 \%$ at June 30 , 2022, and the Total capital ratio was $11.9 \%$ at March 31, 2023, compared to $19.5 \%$ at June 30, 2022. Capital ratios decreased from an increase in assets, primarily loans, partially offset by earnings.

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Bank's capital amounts, and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Regulations regarding prompt corrective actions define specific capital categories based on an institution's capital ratios. The capital categories, in declining order, are "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized."

As of March 31, 2023 and June 30, 2022, the most recent notification from the Bank's regulator categorized the Bank as "well capitalized" under the regulatory framework for prompt corrective action. To be categorized as "well capitalized," the Bank must maintain minimum Common equity tier 1 capital, Total capital, Tier 1 capital and Tier 1 leverage ratios as set forth in the table below. There are no conditions or events since that notification that management believes have changed the institution's regulatory designation as "wellcapitalized" under the regulatory framework for prompt corrective action.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios as set forth in the table below. At March 31, 2023 and June 30, 2022, the Bank's ratios exceeded the regulatory requirements. Management believes that the Bank met all capital adequacy requirements to which they were subject as of March 31, 2023 and June 30, 2022. The Bank's regulatory capital ratios are set forth below as of March 31, 2023 and June 30, 2022.

In addition to the minimum regulatory capital required for capital adequacy purposes included in the table above, the Bank is required to maintain a capital conservation buffer, in the form of common equity, in order to avoid restrictions on capital distributions and discretionary bonuses and to engage in share repurchases. The required amount of the capital conservation buffer is $2.5 \%$.

## Stock Repurchases

On April 20, 2022, the Board of Directors adopted a share repurchase program to purchase up to $\$ 40.0$ million of common stock, or up to $1,000,000$ shares, representing $13.1 \%$ of the Bank's outstanding common stock. This repurchase program may be suspended or terminated at any time without prior notice, and it will expire April 13, 2023. The Bank repurchased 338,940 shares at a weighted average price per share of $\$ 36.85$ through December 31, 2022. The Bank has not repurchased any shares since the quarter ended December 31, 2022 and has let the share repurchase plan expire as of April 13, 2023.

## At-the-Market Offering

On December 12, 2022, the Board of Directors approved and initiated an at-the-market offering of up to $\$ 50.0$ million of common stock. The Bank has issued 193,611 shares at a weighted average net proceeds per share of $\$ 41.29$ through March 31, 2023.

## Off-Balance Sheet Financial Instruments

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, unused lines of credit, standby letters of credit, and commitments to fund investments. These instruments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amounts recognized on the condensed balance sheet. The contract or notional amounts of these instruments reflect the extent of the Bank's involvement in particular classes of financial instruments.

See Part I. Item I. "Notes to Unaudited Financial Statements - Note 9: Commitments and Contingencies" for further discussion.

## Results of Operations

## General

Net income increased by $\$ 1.9$ million to $\$ 12.5$ million for the quarter ended March 31, 2023, compared to net income of $\$ 10.6$ million for the quarter ended March 31, 2022. The increase was primarily due to higher net interest income, partially offset by higher provision (credit) for loan losses, lower correspondent fee income and higher salaries expense, professional fees, deposit insurance expense, and data processing fees.

Net income increased by $\$ 235$ thousand to $\$ 32.1$ million for the nine months ended March 31, 2023, compared to net income of $\$ 31.9$ million for the nine months ended March 31, 2022. The increase was primarily due to higher net interest income, partially offset by higher provision (credit) for loan losses, lower correspondent fee income, higher noninterest expense amounts, and higher income tax expense.

## Net Interest Income

## Three Months Ended March 31, 2023 and 2022

Net interest and dividend income before provision for loan losses increased by $\$ 11.2$ million to $\$ 32.2$ million for the quarter ended March 31,2023 , compared to $\$ 21.0$ million for the quarter ended March 31,2022 . The increase was primarily due to the following:

- An increase in interest income earned on loans of $\$ 29.2$ million, primarily due to an increase in interest income earned on the National Lending Division's originated and purchased portfolios, due to higher average balances in both portfolios and higher rates earned on the originated portfolio, partially offset by lower rates earned on the purchased portfolio; and
- An increase in interest income earned on short-term investments of $\$ 1.8$ million, primarily due to higher rates earned; partially offset by,
- An increase in deposit interest expense of $\$ 16.3$ million, due to higher interest rates and higher average balances in interestbearing deposits; and
- An increase in FHLB borrowings interest expense of $\$ 3.7$ million, primarily due to higher average balances.

The following table summarizes interest income and related yields recognized on the loan portfolios:

The components of total income on purchased loans are set forth in the table below entitled "Total Return on Purchased Loans." When compared to the quarter ended March 31, 2022, transactional income increased by $\$ 583$ thousand for the quarter ended March 31, 2023, and regularly scheduled interest and accretion increased by $\$ 17.1$ million due to the increase in average balances. The total return on purchased loans for the quarter ended March 31, 2023 was $7.6 \%$, a decrease from $8.3 \%$ for the quarter ended March $31,2022$.

The following table details the total return on purchased loans:

(1) The total return on purchased loans represents scheduled accretion, accelerated accretion, gains on real estate owned and other noninterest income recorded during the period divided by the average invested balance, which includes purchased loans held for sale, on an annualized basis. The total return does not include the effect of purchased loan charge-offs or recoveries during the period. Total return is considered a non-GAAP financial measure.

The following sets forth the average balance sheets, interest income and interest expense, and average yields and costs for the three months ended March 31, 2023 and 2022.

The following table presents the extent to which changes in volume and interest rates of interest-earning assets and interest-bearing liabilities have affected the Bank's interest income and interest expense during the periods indicated. Information is provided in each category with respect to (i) changes attributable to changes in volume (changes in volume multiplied by prior period rate), (ii) changes attributable to changes in rates (changes in rates multiplied by prior period volume) and (iii) change attributable to a combination of changes in rate and volume (change in rates multiplied by the changes in volume). Changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Net interest and dividend income before provision for loan losses increased by $\$ 24.8$ million to $\$ 84.6$ million for the nine months ended March 31, 2023, compared to $\$ 59.8$ million for the nine months ended March 31, 2022. The increase was primarily due to the following:

- An increase in interest income earned on loans of $\$ 51.4$ million, primarily due to an increase in interest income earned on the National Lending Division's originated and purchased portfolios, due to higher average balances in both portfolios and higher rates earned on the originated portfolio, partially offset by lower rates earned on the purchased portfolio; and
- An increase in interest income earned on short-term investments of $\$ 3.9$ million, primarily due to higher rates earned; partially offset by,
- An increase in deposit interest expense of $\$ 26.5$ million, due to higher interest rates and higher average balances in interestbearing deposits; and
- An increase in FHLB borrowings interest expense of $\$ 4.4$ million, primarily due to higher average balances.

## Provision for Loan Losses

Quarterly, the Bank determines the amount of the allowance for loan losses that is appropriate to provide for losses inherent in the Bank's loan portfolios, with the provision for loan losses determined by the net change in the allowance for loan losses. For loans accounted for under ASC 310-30, a provision for loan loss is recorded when estimates of future cash flows are lower than had been previously expected. See Part I. Item I. "Notes to Unaudited Financial Statements - Note 4: Loans, Allowance for Loan Losses and Credit Quality" for further discussion.

## Three Months Ended March 31, 2023 and 2022

Provision (credit) for loan losses increased by $\$ 963$ thousand to a provision of $\$ 676$ thousand for the quarter ended March 31, 2023, from a credit of $\$ 287$ thousand for the quarter ended March 31, 2022. The increase in the provision (credit) for loan losses reflects increases in the loan portfolio and increases in specific reserves during the quarter ended March 31, 2023, as compared to decreases in specific reserves during the quarter ended March 31, 2022.

Nine Months Ended March 31, 2023 and 2022
Provision (credit) for loan losses increased by $\$ 3.5$ million to a provision of $\$ 1.9$ million for the nine months ended March 31 , 2023, from a credit of $\$ 1.6$ million for the nine months ended March 31, 2022. The increase in the provision (credit) for loan losses reflects increases in the loan portfolio, an increases in one qualitative factor, and increases in specific reserves during the nine months ended March 31, 2023, as compared to decreases in certain qualitative factors as a result of continued improvements relative to the COVID-19 pandemic during the nine months ended March 31, 2022.

## Noninterest Income

## Three Months Ended March 31, 2023 and 2022

Noninterest income decreased by $\$ 4.2$ million for the quarter ended March 31, 2023, compared to the quarter ended March 31, 2022, principally due to the following:

- A decrease in correspondent fee income of $\$ 4.6$ million from the recognition of correspondent fees and net servicing income. Correspondent income for the quarters ended March 31, 2023 and 2022 is comprised of the following components:

| Three Months Ended March 31, |  |  |  |  |
| :---: | ---: | :---: | ---: | :---: |
| 2023 |  |  | 2022 |  |
|  |  | (In thousands) |  |  |
| $\$$ | 9 | $\$$ | 1,087 |  |
|  | 165 |  | 1,690 |  |
|  | 153 |  | 2,193 |  |
| $\$$ | 327 |  | $\$$ |  |

The Bank has $\$ 317$ thousand of unamortized correspondent fee and purchased accrued interest remaining at March 31, 2023.
The decrease in correspondent fee income was partially offset by:

- A decrease in unrealized loss on equity securities of $\$ 338$ thousand; and
- An increase in gain on sale of SBA loans of $\$ 228$ thousand, due to the sale of $\$ 4.6$ million in SBA loans during the quarter ended March 31, 2023.

Nine Months Ended March 31, 2023 and 2022
Noninterest income decreased by $\$ 16.2$ million for the nine months ended March 31, 2023, compared to the nine months ended March 31, 2022, primarily due to the following:

- A decrease in correspondent fee income of $\$ 16.5$ million from the recognition of correspondent fees and net servicing income. Correspondent income for the nine months ended March 31, 2023 and 2022 is comprised of the following components:

| Nine Months Ended March 31, |  |  |  |  |
| :--- | ---: | ---: | ---: | :---: |
| 2023 |  |  | 2022 |  |
|  |  | (In thousands) |  |  |

|  | 2,327 | $\$$ | 18,842 |  |

## Noninterest Expense

## Three Months Ended March 31, 2023 and 2022

Noninterest expense increased by $\$ 2.4$ million for the quarter ended March 31, 2023 compared to the quarter ended March 31, 2022, primarily due to the following:

- An increase in salaries and employee benefits expense of $\$ 1.2$ million, primarily due to increases in regular employee compensation and stock compensation expense;
- An increase in professional fees of $\$ 411$ thousand, primarily due to increased legal expense;
- An increase in deposit insurance expense of $\$ 345$ thousand, primarily due to the increase in average assets and decrease in Tier 1 leverage ratio, which increased the Bank's assessment rate; and
- An increase in data processing fees of $\$ 202$ thousand, primarily due to increases in IT hardware and software expense, IT professional implementation expense, and IT outsourced processing expense.

Nine Months Ended March 31, 2023 and 2022
Noninterest expense increased by $\$ 4.2$ million for the nine months ended March 31, 2023 compared to the nine months ended March 31, 2022, primarily due to the following:

- An increase in salaries and employee benefits expense of $\$ 2.9$ million, primarily due to increases in regular employee compensation, stock compensation, and bonus expense;
- An increase in other noninterest expense of $\$ 665$ thousand, primarily due to an increase in meals and entertainment expense of $\$ 411$ thousand, and an increase in deposit expense of $\$ 303$ thousand, primarily from increased excess deposit insurance costs;
- An increase in professional fees of $\$ 476$ thousand, primarily due to increased legal expense;
- An increase in occupancy and equipment expense of $\$ 446$ thousand, primarily due to expenses associated with the new lease of office space in Boston, Massachusetts; and
- An increase in deposit insurance expense of $\$ 386$ thousand, primarily due to the increase in average assets and decrease in Tier 1 leverage ratio, which increased the Bank's assessment rate; partially offset by,
- A decrease in loan expense of $\$ 1.1$ million, primarily due to a $\$ 1.5$ million decrease in correspondent expense, due to $\$ 1.6$ million of one-time correspondent expenses associated with the wrap-up of PPP origination activity during the nine months ended March 31, 2022, partially offset by a decrease in collection expense reimbursements during the nine months ended March 31, 2023.

## Income Taxes

## Three Months Ended March 31, 2023 and 2022

Income tax expense increased by $\$ 1.7$ million to $\$ 6.4$ million, or an effective tax rate of $33.8 \%$, for the quarter ended March 31 , 2023, compared to $\$ 4.7$ million, or an effective tax rate of $30.6 \%$, for the quarter ended March 31,2022 . The increase in income tax expense is due to the increase in pre-tax income. The increase in the effective tax rate from March 31, 2022 is primarily due to changes in state tax apportionment and changes to permanent tax differences.

Nine Months Ended March 31, 2023 and 2022
Income tax expense increased by $\$ 766$ thousand to $\$ 14.7$ million, or an effective tax rate of $31.4 \%$, for the nine months ended March 31 , 2023 , compared to $\$ 13.9$ million, or an effective tax rate of $30.4 \%$, for the nine months ended March 31 , 2022. The increase in income tax expense is due to the increase in pre-tax income. The increase in effective tax rate is primarily due to changes in state tax apportionment and changes to permanent tax differences.

## Item 3. Quantitative and Qualitative Disclosure about Market Risk

Not required for smaller reporting companies.

## Item 4. Controls and Procedures

The Bank maintains controls and procedures designed to ensure that information required to be disclosed in the reports the Bank files or submits under the Securities Exchange Act of 1934 ("Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the FDIC, and that such information is accumulated and communicated to the Bank's management, including the Chief Executive Officer and Chief Financial Officer (the Bank's principal executive officer and principal financial officer, respectively), as appropriate to allow for timely decisions regarding timely disclosure. In designing and evaluating disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost/benefit relationship of possible controls and procedures.

The Bank's management, with the participation of the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q.

Based on this evaluation of the Bank's disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures were effective as of March 31, 2023.

There were no changes in the Bank's internal controls over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during the quarter ended March 31, 2023 that have materially affected, or is reasonably likely to materially affect, the Bank's internal controls over financial reporting.

## PART II - OTHER INFORMATION

## Item 1. Legal Proceedings

None.

## Item 1A. Risk Factors

This section supplements and updates certain of the information found under Part I, Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended June 30, 2022 filed with the FDIC on September 9, 2022 (the "Annual Report"), based on information currently known to us and recent developments since the date of the Annual Report filing. The matters discussed below should be read in conjunction with the risks described in Part I. Item 1A. "Risk Factors" of our Annual Report. However, the risks and uncertainties that we face are not limited to those described below and those set forth in the Annual Report. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect our business and the trading price of our securities.

## Adverse developments affecting the financial services industry, such as actual events or concerns involving liquidity, defaults, or non-performance by financial institutions or transactional counterparties, could adversely affect our financial condition and results of operations.

Actual events involving limited liquidity, defaults, non-performance or other adverse developments that affect financial institutions, transactional counterparties or other companies in the financial services industry or the financial services industry generally, or concerns or rumors about any events of these kinds or other similar risks, have in the past and may in the future lead to market-wide liquidity problems. For example, on March 10, 2023, Silicon Valley Bank ("SVB") was closed by the California Department of Financial Protection and Innovation, which appointed the FDIC as receiver. Similarly, on March 12, 2023, Signature Bank was swept into receivership. A statement by the U.S. Department of the Treasury (the "Treasury"), the Board of Governors of the Federal Reserve System (the "Federal Reserve") and the FDIC indicated that all depositors of SVB would have access to all of their money after only one business day of closure, including funds held in uninsured deposit accounts.

Inflation and rapid increases in interest rates have led to a decline in the trading value of previously issued government securities with interest rates below current market interest rates. Although the Treasury, FDIC and Federal Reserve have announced a program to provide up to $\$ 25$ billion of loans to financial institutions secured by certain of such government securities held by financial institutions to mitigate the risk of potential losses on the sale of such instruments, widespread demands for customer withdrawals or other liquidity needs of financial institutions for immediate liquidity may exceed the capacity of such program. Additionally, there is no guarantee that the Treasury, FDIC and Federal Reserve will provide access to uninsured funds in the future in the event of the closure of other banks or financial institutions, or that they would do so in a timely fashion.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes issuances of the Bank's outstanding common shares in the third quarter of fiscal year 2023:

| Period | Total Number of Shares Issued | Average Price Received Per Share |  | Total Number of Shares Issued as Part of Publicly Announced Plans or Programs | Maximum Amount that May be Issued Under the Plans or Programs |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| January 1, 2023 - January 31, 2023 | - | \$ | 0.00 | - | \$ | - |
| February 1, 2023 - February 28, 2023 | 62,258 |  | 43.62 | 62,258 |  | 48,854,752 |
| March 1, 2023 - March 31, 2023 | 97,848 |  | 43.14 | 97,848 |  | 41,634,000 |
|  | 160,106 | \$ | 43.32 | 160,106 | \$ | 41,634,000 |

On December 12, 2022, the Board of Directors approved and initiated an at-the-market offering of up to $\$ 50.0$ million of common stock. The Bank has issued 193,611 shares at a weighted average net proceeds per share of $\$ 41.29$ through March 31, 2023.
